

Sean O'Reilly

FULLSTACK DEVELOPER

+ (1) 913 961 0388 | soreilly424@gmail.com

Summary

Fullstack developer with 4+ years building fast, accessible UIs in React/Next.js and TypeScript.

Currently serving as technical co-founder, architecting systems from DevOps to frontend.

Passionate about building clean, performant, and accessible web experiences that create meaningful impact.

Skills

- TypeScript, React/Next.js
- HTML5, CSS3 (Flexbox/Grid)
- Tailwind/Shadcn UI
- Core Web Vitals, Lighthouse
- Accessibility (WCAG 2.1, ARIA)
- REST/GraphQL
- PostgreSQL
- Sanity and Craft CMS
- React Query
- Git/GitHub Actions, CI/CD
- Node.js
- Jest, React Testing Library, Cypress
- AI-native dev tools: Claude Code, Cursor

Education

B.S. in History & Sociology,
University of Kansas

Full Stack Bootcamp, Le Wagon

Employment History

Technical Co-Founder & Lead Developer — LIFO App (2024–Present)

- Directed critical technical decisions across the full stack, resulting in enhanced performance of the Next.js/TypeScript frontend
- Built a real-time inventory dashboard integrating Google Vision API for OCR processing, transforming unstructured image data into actionable business insights
- Built and iterated on production features using AI-native development tools (Claude Code, Cursor) as core workflow
- Optimized React Query implementation, reducing API calls by 70% and significantly improving dashboard performance for real-time data visualization
- Managed a team of 4 across 3 time zones to develop and launch a new software product

Front-End Developer — TrendyMinds Inc. (2021–2023)

- Architected high-performance web applications using Next.js, TypeScript, and Tailwind CSS for 10+ enterprise clients
- Built reusable component libraries with a strong focus on WCAG accessibility standards, reducing development time by 25% across projects
- Integrated Craft CMS with Next.js and React, enabling editorial teams to manage content seamlessly through headless CMS workflows

Projects

VoyageAway (2023–Present) | React, Supabase, Tailwind CSS, Vercel

- Built a wildlife discovery platform integrating the iNaturalist API, enabling users to search any animal and explore real observation data including habitat, conservation status, and threats
- Designed a responsive, mobile-first UI with Tailwind CSS with a strong focus on accessibility
