PROFESSIONAL SUMMARY

Full-stack developer with 4+ years building production applications. Currently serving as technical co-founder of AI-powered platform, architecting systems from DevOps to frontend. Passionate about building ethical technology that creates meaningful impact.

WORK EXPERIENCE

Technical Co-Founder & Lead Developer LIFO AI

- August 2024 - current Netherlands (Remote)
- Directed critical technical decisions for the full stack, resulting in enhanced performance of the Next.js/TypeScript frontend and improved reliability of Digital Ocean infrastructure.
 - Built real-time image recognition dashboard integrating Google Vision API for OCR processing, handling unstructured image data and transforming it into actionable inventory insights
 - Optimized React Query implementation, reducing API calls by 70% and significantly improving dashboard performance for real-time data visualization
 - Managed a team of 4 across 3 different time zones to develop and launch a new software product

Founder & Full-Stack Developer VoyageAway

- 2024 - current Remote
- Developed a global travel community platform using React and Supabase, facilitating 500+ sustainable adventure discoveries and fostering meaningful connections among users.
 - Developed user authentication and real-time database functionality, enhancing community interaction with user profiles and post features for a platform supporting over 1,000 active users.
 - Designed responsive UI with Tailwind CSS focusing on accessibility and mobile-first experience
 - Deployed the application on Vercel using a serverless architecture, achieving reduced load times by 30% and improved resource management.

Frontend Developer TrendyMinds Inc

- January 2022 - July 2023 Indianapolis, IN (Remote)
- Architected high-performance web applications using Next.js, TypeScript, and Tailwind CSS for 10+ enterprise clients
 - Built reusable component libraries with strong focus on WCAG accessibility standards, reducing development time by 25% across projects
 - Integrated Craft CMS with Next.js and React, enabling editorial teams to manage content seamlessly with headless CMS workflows.
